The Gemini 2 Equipment Enclosure from **Openchannelflow** is designed to protect a wide range of equipment from the effects of corrosion, weather, and vandalism, including:

Portable and refrigerated wastewater samplers:

- Teledyne, Hach, E+H, and YSI portable and composite samplers
- Parameter monitoring equipment
- Flow meters
- Telemetry and monitoring systems

Thoroughly insulated with foam encapsulated in the walls and floor, Gemini 2 enclosures keep your equipment cool in the summer and warm in the winter. For active temperature control, heaters, vents, and cooling fan packages are available. All Gemini 2 enclosures are made from premium, U.V. stable marine grade resins and gel coats to ensure a long, useful life.

Hinges and connection hardware are stainless steel; while locking latches and lift handles are made from composites or other corrosion resistant materials – all to ensure a long operational life for your valuable equipment – even under the most demanding of conditions!

The gull wing access door is supported by redundant, dual gas struts to ensure ease of operation even with snow or ice accumulations on the door.
