

Whether your fiberglass shelter needs to blend seamlessly into its surroundings—or stand out for visibility and safety—**Openchannelflow** gives you the flexibility to get it right.

Standard Exterior		Standard Exterior Color Options	
Polar White (RAL 9010)	Storm Gray (RAL 7042)	Desert Tan (RAL 1001)	Utility Green (RAL 6011)

For more specialized applications, **Openchannelflow** Fiberglass Shelters are available in any one of our 210+ colors. Need to mix and match shelter and door colors? Need to have the shelter patterned in alternating color squares or stripes?

Unlike paint which sits on the surface, our U.V. resistant gel coats are chemically bonded to the fiberglass itself. The result is an attractive, low maintenance finish. For the life of the shelter, you will never need to repaint – resulting in lower maintenance costs over other materials.
